## ALCANADRE

ALCANADRE is a comfortable 45 liter backpack designed for canyoning. It is made of TPU material, and its welded construction provides greater strength. The pack has multiple drain holes to optimize water evacuation. Extensive accessorization facilitates maneuvers: attachment lanyard, interior colored rings for attaching rope ends, top flap with mesh pocket. Long approaches are no problem, thanks to the padded shoulder straps and back panel, and to the foldaway waistbelt.

Extensive accessorization with two different-colored rings inside the pack for attaching the rope ends

Comfort: lined back panel, padded shoulder straps, removable waist strap, and comfortable sheathed carrying handle.

---

**Short Description** Large volume pack for transporting canyoning equipment

---

**Selling Points**
