INSTRUCTIONS FOR USE

Black Diamond ice tools are designed for use in mountaineering and ice climbing. Some models are also designed for extreme mountaineering, and dangerous activities and accept the risks involved before participating. Minors and others not able to assume this responsibility must be under the direct control of an experienced and responsible person. You are responsible for your own actions and decisions. Before using this product, read and understand all instructions and warnings that accompany it and familiarize yourself with its proper use, capabilities and limitations. Seek qualified instruction. Contact Black Diamond if you are uncertain about how to use this product. Do not modify this product in any way. Failure to read and follow these warnings can result in severe injury or death!

In most cases, you should have two tools to climb. To protect yourself, always carry at LEAST one spare tool, as well as a spare carabiner and rope. Carrying spares is essential for some of the risks involved in ice climbing and mountaineering. Climbing without leashes increases your risk of falling and of dropping your ice axe. DO NOT climb without leashes when roped or when the consequences of a fall could be severe. (See accompanying illustrations)

CARE AND MAINTENANCE

Improper gear may not come into contact with corrosive materials, such as battery acid, battery fumes, solvents, chlorine bleach, antifreeze, isopropyl alcohol or gasoline. After contact with saltwater or salt air, always rinse and dry textile products, and metal, and metal products. (See accompanying illustrations)

INSPECTION, RETIREMENT AND LIFESPAN

Under normal use (20 to 50 days per year), the lifespan of a Type 1 (EN 13089, den europeiske standarden for "Fælsklatring") and a replaceable pick on a Type 2 (EN 13089, den europeiske standarden for "Fælsklatring") ice axe is 3 years and 1 year, respectively. Frequent use on extreme climbing can reduce the lifespan of your ice tool. Some activities that would reduce its lifespan are hitting rocks, twisting the axe and pick, and drytool climbing on rock. Your ice tools are strong, but not indestructible. Any part of an ice tool could conceivably break.

If you have any doubts about the dependability of a tool or component, retire it and get a new one. Anytime you retire a piece of equipment, you are responsible for its safe use. (See accompanying illustrations)
