

BOLT-ON HOLDS

Over 1000 Bolt-on Holds
Seven different colours

BOLT-ON HOLDS signs of quality

SAFETY

- All medium and large sized bolt-on holds incorporate an EPS. Explosion Proof System.
- EPS is a proprietary strength and safety device, cast into our holds that the bolt passes through upon installation.
- In the event of an over-tightened hold breaking during use, EPS captures the bulk of the hold which reduces the risk to people below of being struck by flying debris.
- Designed and tested to comply with EN12572-3.

QUALITIES

- Over 1000 Bolt-on holds available. Our polyester resin holds that have been well established on the world market for over 15 years.
- Widely regarded to offer the best frictional properties.
- The European Standard ensures that products are chemically safe, non-toxic and are ergonomically designed. A number of tests are also carried out to ensure that the risk of trapping fingers, clothing toggles and buckles is minimised.

AESTHETICS

- Size range available from XS to XXXL in 7 different colours.
- Single hold sets available through to diverse sets of up to 50 bolt-on holds.
- Size, style and shape of holds available for beginners through to advanced climbers.
