## LASER SPEED LIGHT

Ultra-light ice screw reduces every possible gram of weight for mountaineering. The aluminum tube, associated with a steel drill, makes the screw lighter. The integrated folding crank gives an optimized lever, making it easier and faster to screw in.

The aluminum tube makes the screw considerably lighter.

Better handling and screwing speed thanks to the ergonomics of the aluminum hanger and its integrated crank. One-handed use: the screw starts with a single quarter turn.

---

**Short Description** Ultra-light ice screw with integrated crank

---

**Selling Points**

- Maximized weight reduction:
  - ultra-light aluminum tube, ideal for mountaineering when reduced equipment weight is a priority
- Easier bite:
  - the shape of the drill is optimized to facilitate bite into the ice
- Easier drill sharpening with the drill's patented sharpening reserve
- Quick and easy screwing:
  - integrated flexible crank provides excellent grip and an optimized lever, making it easier and faster to screw in
  - compact hanger to facilitate screwing into sculpted ice
  - color-coding facilitates identifying the length of a screw

---

**Specification**

- Material(s): steel drill, anodized aluminum tube, aluminum hanger
  - Certification(s): CE, UIAA
-
